

Risk Assessment – VI_014_Radiation swabs

Carried out by:	Tiphaine Bouriez-Jones – Laboratory Manager	Date carried out:	May 2015	Review Date:	May 2018	
Hazard (Cause and consequence)	Affected Groups	Existing controls			Risk	Further Action
Exposure to radiation	Staff Students	<p>Only trained users who have shown evidence of their experience to the Senior Radiation Protection Officer will have access to the Radiation suite.</p> <p>Each user is registered with the University Safety Office and must undertake training before below allowed to commence work.</p> <p>A detailed risk assessment of the procedure and the waste stream must be drafted with the SRPS before ordering any radioactive material.</p> <p>Ordering, delivery, storage, use and waste of radiation material is covered in the Radiation Code of Practice.</p> <p>Every user must double glove, wear a leak-resistant disposable gown. Engineer must have completed a Permit of Work and the equipment to be serviced or fixed must have been appropriately decontaminated.</p>			Low	None
Injury due to misuse or faulty equipment	Staff Students	<p>All users are trained in the correct operation of instruments. Specialised equipment such as centrifuges and incubators are under maintenance service contract.</p>			Low	None

Risk Assessment – VI_014_Radiation swabs

Being trapped in the radiation suite out of hours (door release mechanism no longer functioning)	Staff Students	Emergency release of the door mechanism present on the side of the door.	Low	Yearly maintenance service contract
Exposure to chemical Count off: H314 Causes severe skin burns and eye damage Decon 90: H314 Causes severe skin burns and eye damage	Staff Students	Users are trained in the safe use of those chemicals. Inhalation: Spray bottles are used for Count off – this must be use with caution. Skin adsorption: Users must wear gloves at all time whilst working in the radiation suite. Eye instillation: User must wear safety spectacles at all time whilst working in the radiation suite.	Medium	None

It is the users responsibility to ensure what controls are needed to ensure that the health of themselves and others around them. It is imperative that you **DO NOT** start any work until you are absolutely sure of the appropriate precautions that need to be employed. If you are unsure seek advice from your line/laboratory manager or your departmental safety officer (DSO).
